SUMMARY

Computer Science student with hands-on experience in artificial intelligence, software engineering, and digital transformation initiatives. Proven ability to build and deploy impactful Full-Stack solutions serving 400+ users, drive 1M+ impressions through digital campaigns, and lead projects from concept to deployment. Experienced in organizing technical events and contributing to community-focused programs.

EDUCATION

Islamic University of Madinah

Madinah, Saudi Arabia

Bachelor's Degree in Computer Science | GPA: Excellent (Honors)

Expected: 2027

- Maintained an Excellent academic standing, earning recognition as an Honors Student.
- Actively participated in multiple tech hackathons and organized student club activities.
- Dedicated extensive hours to charitable and volunteer initiatives across the community.

EXPERIENCE

AI-Madinah Student Care Association

Madinah, Saudi Arabia

Volunteer Full-Stack Developer

Mar 2025 – Present

- Spearheaded the organization's digital transformation by engineering a centralized platform to manage student data, housing, automated payments, and rewards for over **400+** students.
- Implemented secure Role-Based Access Control (RBAC) for supervisors, transitioning manual operations into a smart, automated workflow that significantly reduced processing time.

Sadat Al-Mabani for Contracting

Madinah, Saudi Arabia

Software Engineer & Digital Specialist

2025

- Developed and deployed a dynamic, CMS-driven corporate website, enabling administrators to seamlessly update company profiles, text, and project portfolios in real-time.
- Single-handedly directed Google Ads and digital marketing campaigns over 6 months, successfully driving **56,641** clicks and over **1,000,000+** impressions to maximize business ROI.

PROJECTS

Basira (Digital Balance App) | Mobile App Development

Personal Project

- Developed a digital well-being application designed to combat social media addiction by actively blocking short-form content (shorts and stories).
- Empowered users to regain focus and productivity through customizable smart notification filtering and automated routine scheduling.

SmartSoftware | AI-Powered Project Management

MenaML Winter School (KAUST)

- Built an all-in-one, AI-powered project management platform that automates planning by translating natural language into structured, actionable tasks.
- Showcased the platform at the Middle East Machine Learning Summit (MenaML), demonstrating its ability to unify workflows and track progress in real-time.

Tebyan Platform | AI Educational Assistant

Academic Project

- Built an AI-powered student learning assistant capable of automatically generating dynamic mind maps and study notes, significantly reducing manual preparation time.

- Integrated AI models to personalize the learning experience and improve study efficiency for students.

Waseef | *AI-Powered Sign Language Communication Platform*

Personal Project

- Engineered an AI-powered system that provides seamless, two-way translation between sign language gestures and real-time text or voice.
- Designed the solution specifically to empower the deaf and hard-of-hearing community, facilitating seamless daily communication.

AI Books Library | *AI Research Platform*

Academic Project

- Built a comprehensive digital library platform equipped with an AI research assistant capable of processing up to **34,000** books per batch.
- Developed a responsive user interface with advanced search features and a high-performance backend system.

LEADERSHIP & ACTIVITIES

Artificial Intelligence Center | *Event Organizer*

2024 – Present

- Participated in preparing and equipping the university's AI laboratory, including installing operating systems, configuring software tools, and setting up development environments for teaching and training.
- Organized and managed more than **3 AI-focused events and workshops** attended by over **50+** students.
- Coordinated event planning, logistics, and participant engagement activities.

Future Minerals Pioneers Hackathon | *Qualified Team*

2025

- Qualified among participating teams to advance in the Future Minerals Pioneers innovation competition.
- Collaborated with a multidisciplinary team to develop technology-driven solutions for mining industry challenges.

Industriathon Industrial Innovation Hackathon | *Qualified Team*

2026

- Qualified among participating teams in a national industrial innovation hackathon.
- Applied software engineering and AI concepts to address manufacturing and operational challenges.

SKILLS

AI & Data: Deep Learning, Computer Vision, LLM Applications, Data Analysis

Software Engineering: Full-Stack Development, Software Architecture, System Design, Database Design, API Development

Programming: Python, Java, Kotlin, JavaScript/TypeScript, SQL

Tools & Technologies: React, Next.js, Git, Docker, AWS Cloud, Power BI

Professional Skills: Leadership, Project Management, Problem Solving, Team Collaboration, Communication

CERTIFICATIONS & TRAINING

Artificial Intelligence & Data Science

- Advanced & Intro to Artificial Intelligence Program – **KAUST**
- HCIA-AI – **King Saud University (KSU) & ICT Academy**
- Data Science and Artificial Intelligence Bootcamps – **Satr**

Cloud, Security & Networking

- AWS Cloud Practitioner – **FutureX**
- HCIA-SECURITY – **TVTC**
